EUniv: European University on Radioactive Waste Management

Overview EURAD-2 WP proposals, Pitch session, online
February 14, 2023

EURAD SRA:

- All themes can be addressed

Establishment of a European Virtual University for Radioactive Waste Management (RWM)

- Individual courses, Bachelor, Master, PhD
- Teachers from different Universities, WMO, TSO and RE institutes across Europe

Knowledge management is high on the agenda in Europe for the development of RWM.

EURAD can provide broad knowledge towards state-of-the-art teaching

- Establishment of a virtual university
- Different experiences and levels across the EU
- Often partial but essential knowledge, locally limited number of people
- **Cooperation** between universities, institutes and companies can lead to unparalleled knowledge
- Modern technologies provide means to virtually reach all students, anywhere, anytime.
- Based on the Bologna process and similar endeavours (World Nuclear Organization)
- Targeted courses for different needs
- Study of how to keep it sustainable in the long run
